LeetCode

OBJECTIVE

Recent Computer Science graduate with hands-on experience in Generative AI and full stack development, seeking an AI Engineer role to build real-world AI solutions and grow with an innovative team. Bring practical internship exposure in GenAI, Machine Learning, and Full Stack development with a strong drive to keep learning.

EDUCATION

SNS college of Technology, Coimbatore 2022-2026

Bachelor of Engineering in Computer Science | CGPA:8.8

SRSI.Matric.Hr.Sec.School, Coimbatore 2021-2022

Higher Secondary - 89%

SKILLS

Languages: Python, Java, SQL, JavaScript

AI / ML: Basic ML concepts, Prompt Engineering, exposure to OpenAI API and LangChain

Frameworks & Tools: REST APIs, MySQL, Git, GitHub

Front-End: React.js, HTML, CSS

CS Fundamentals: OOP, DSA, Complexity Analysis, Problem Solving

Cloud & AI Platforms: Microsoft Azure AI, Oracle Cloud AI, Databricks, Salesforce Agentforce

INTERNSHIPS

Full stack development Intern – XploreITcorp 2024

- Built and deployed responsive web modules using Python, HTML, CSS, and JavaScript.
- Documented and resolved technical issues to ensure stable production deployments.

Generative AI Virtual Intern – Skillible (AICTE) 2024

- Designed and deployed a GenAI-powered tutoring assistant, handling end-to-end development from prompt engineering to deployment via 10+ GitHub commits.
- Gained practical exposure to LLM fundamentals, limitations, and responsible AI practices.

Machine Learning Intern – Acmegrade (IIT Bombay) 2023

- Improved prediction accuracy by implementing 2 ML classification models using Python; analyzed data anomalies and model errors to troubleshoot and optimize performance.
- Practiced data preprocessing and model evaluation to strengthen understanding of ML pipelines.

PROJECTS

IntraMind – AI Chatbot for Organizations | Generative AI, NLP, Python 2026

- Built an AI-powered chatbot enabling employees to query HR policies and guidelines using natural language.
- Developed end-to-end using prompt engineering and LLM integration with mock interview and feedback summarization.

SmartLedger AI – Finance Manager for Field Agents | React.js, Python, Flask, MySQL 2026

- Built a finance tracking system for field agents to log sales and expenses with automatic profit/loss calculation.
- Integrated an AI analytics layer using Pandas to visualize spending patterns and support smarter financial decisions.

Production Management System | Java, Spring Boot, MySQL 2025

- Analyzed and resolved integration issues between REST APIs and MySQL database for real-time manufacturing.
- Implemented activity logging, and secure coding practices to ensure data integrity and controlled system access.

E-Commerce Web Application 2024

- Developed a full stack shopping site with product listing, cart, and user login functionality.
- Resolved frontend-backend integration issues to deliver a stable, production-ready application.

ACHIEVEMENTS & CERTIFICATIONS

- **Organized Algorithm Design (Technical) and IPL Auction (Non-Technical) events – 2025.**
- Completed **Wipro TalentNext – Java Full Stack Development Program** (4 months).
- Runner up in an Ideathon and solved **450+ problems in LeetCode**, enhancing my DSA skills.
- **Microsoft Certified: Azure AI Fundamentals** (Sep 2025) - [Certificate](#)
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** – Aug 2025 – [Badge](#)
- **Salesforce Certified Agentforce Specialist** – (Aug 2025) – [Certificate](#)
- **Databricks Gen AI & Databricks Fundamentals** (Sep 2025) - [Certificate](#)
- **NPTEL Elite – Privacy & Security in Online Social Media (68%, Jan–Apr 2025)** - [Certificate](#)
